LONDON BARELY HOLDING HER PLACE WITH NEW YORK

In Another Year at the Present Rate of Growth the American City Will be in the Lead in Population—Hard to Make Comparison in Land Wealth Worth to Different Methods of Assessment—Big Contrast in Matter of Fire Protection.

London, Sept. 5.—London is particularly near following behind New York in the matter of population, according to figures just compiled with the United States census and New York health department statistics. These figures are:—
New York 4,458,964
London 4,748,217
London has been growing very fast in the last ten years, but New York is growing much faster owing to her enormous immigration from Europe, amounting to more than 1,000,000 a year. The increment of London's population comes heavily from the country districts of the United Kingdom. It is believed here that a census of both cities taken as of June 1, 1911, will show that New York has slightly the larger number of inhabitants, and has thus become the largest metropolis in the history of the world. This is of course on the assumption that London does not mean to take in more of its outlying territory. The areas of London and New York now compare as follows:
New York 29,215 acres
London 1,743 acres

No close comparison between the landed wealth of the huge two cities can be made on account of the different methods of valuation. The municipal taxes of New York are applied to the land for the purpose of raising the capital value or market value of both real and personal property in the city. The same is the case in London. But in New York as well as throughout the United States, the capital value or market value of both real and personal property in the city is the basis of assessment for taxation. The latest census returns of valuation are: New York, \$6,126,480,000; London, \$256,000,000; New York, \$6,126,480,000; London, \$256,000,000.

PROHIBIT AIRSHIP FLIGHT.

Authorities of German City Aired Fortifications May Be Photographed.

Strasbourg, Germany, Sept. 5.—A circular has been issued by the German authorities in a complete prohibition for the Zeppelin, like the dirigible, carrying a ship to make trips over the city or vicinity has been decreed by the government and military authorities. It is said that even passengers might photograph the fortifications and therefore it was decided to grant landing facilities to the airships. In consequence of this order the company which has been arranging an airship service from Baden-Baden will be compelled to return the passage money paid by persons intending to make trips from Baden-Baden to other points.

THE FORTIFICATION OF PANAMA CANAL

The Times Says There is no Reason Why Great Britain and the United States Should Not See Eye to Eye in This.

London, Sept. 6.—The proposal to fortify the Panama canal, put forward by the United States, has been the subject of discussion in the newspapers here.

The Times says there is no reason why Great Britain and the United States should not see eye to eye in this. In this as in all other international affairs, to see it eye to eye with the United States. The other powers, however, might not see it eye to eye, but the guarantee of neutrality should not be in the care of a single power.

In the event of a disagreement, the Times says that it is not to be doubted that America would welcome the submission of the question to an international court.

Gen. Booth's Daughter in Need.

London, Sept. 5.—Mrs. Katherine Booth-Clifford, eldest daughter of Gen. Booth, is in need of money.

The General's daughter, who is now known as "the Marchioness," is destitute, and, according to Horatio Molyneux, M.P., she is actually in need of bread for herself and her children. According to published statements the head of the Salvation Army refuses to hold any claim on the General's daughter, who is now known as "the Marchioness," is destitute, and, according to Horatio Molyneux, M.P., she is actually in need of bread for herself and her children. CRIPPEN'S TRIAL BEGINS IN LONDON

Public Interest Remains Undiminished in the Case—Charge Against Miss Leneve Dropped.

Canadian Associated Press.
London, Sept. 14.—Hector H. Crippen and Miss Leneve appeared again in Bow Street Police court today to answer the charge of murder.

Apparently there was no diminution in the public interest in the case as an eager crowd assembled as early as 7 o'clock. When Miss Leneve arrived in a cab there was a great rush, which the police had great difficulty in stemming.

Crippen arrived in the police van with special guard. A Canadian journalist of the name named Watson, who was accompanied with a seat on the bench during the proceedings. Crippen had a slight air but Miss Leneve blue as a rule.

Drop Leneve Charge.

The prosecution announced that it had decided to drop the charge against Leneve. Travers Humphrey, the prosecuting counsel, said that the good terms existing between the accused and his wife were more apparent than real. Crippen had said that his wife gave him a great deal of trouble, and that he decided upon separation. Her counsel, Mr. Burt, said that it seemed to have become fond of another man.

Three years ago Miss Leneve had lived on very intimate terms with Crippen. Leneve, said Miss Leneve, had been in the house for some time, but she felt very jealous, and refused to let Crippen go about with his wife.

On the night of January 23rd Crippen invited Mr. and Mrs. Martlett to take part with him and his wife and have a game of cards. Martlett became unwell next day, and Crippen called and asked after his wife.

That night was the last occasion on which Crippen and his wife were seen. Next day Miss May, of the "Maiden Ladder" club, received a letter from "Miss Leneve, per H. H. C." and announcing that she had been in the house for some time, but she felt very jealous, and refused to let Crippen go about with his wife.

The counsel said that Professor Hepper had found traces of hyacinth in the house in Hilltop Crescent, amounting to 10 to 15 in the garden. The counsel said that the alleged hurried and unanticipated departure of Miss Leneve, and Crippen's announcement of her death in California, as soon as the trial began, were all circumstances which pointed to the guilt of Crippen.

He also told of Inspector Dowd's interview with Crippen at the beginning of July. Crippen stated that on October 1st he had been in the house for some time, but she felt very jealous, and refused to let Crippen go about with his wife.

Accessory After Fact.
The counsel announced that it would contest the allegation against the girl to a charge of being an accessory after the fact. Humphrey refused the case down to the time of the arrest of Crippen and Leneve on Monday.

The witness in the case were then heard.

FURTHER TROUBLE IN 'PEG LOCKOUT

Men Resumed Work on Loyal Mitchell & Co's Works, but Quit Ten Minutes Later.

Winnipeg, Sept. 6.—Prospects point to further trouble in connection with the bricklayers and masons' lockout. Operations were resumed on all Builders' Exchange jobs, including Loyal Mitchell & Co's works, at seven o'clock this morning. Ten minutes later the men on the Loyal Mitchell & Co's contracts were again called off by A. J. Greeve, vice-president of the union.

He claimed to be acting under orders from headquarters of the union in Minneapolis, but did not give any other reason for his action. The result was the tying up of the Loyal Mitchell & Co's works, as far as bricklaying is concerned.

The bricklayers and masons are supposed to be on their way here from Minneapolis to take no longer in the trouble. A good deal of curiosity exists as to the motives of the men who are on their way here.

Wall, special treasury agent, was that Mrs. Adriance had purchased a necklace of pearls in Florence. There was an attempt to interfere with Mrs. Adriance until after ten trunks and boxes had been loaded on the steamer. The agent said Mrs. Adriance had paid \$150 duty on dress goods. Customs officials noticed that Mrs. Adriance had set down each item,

was provided with the accompanying receipts to show sums paid for goods purchased. Mrs. Mary Ann Mackintosh, a deputy surveyor, asked whether she had purchased any jewelry. He spoke of a search of the clothing on board the steamship. "This is a piece of impertinence," said Mr. Adriance. "I question your right to search my property." Mackintosh then directed that Mrs. Mackintosh, Mr. and Mrs. Darragh, inspectors, to accompany Mr. Adriance and her daughter to a stateroom on board the ship and make a careful search. A search of mesh bags and some lace were made, but the inspectors found nothing to seize. When the mesh bag was found, Mrs. Adriance took from it,

An Edmonton man who covers a good deal of the province to rail each year struck in a C. and E. village not far from Red Deer town this morning what he considered a very good chance.

When he was dressing in the morning his collar button broke, and he got another from the hotelman. When he went to pay him, the hotelman wanted to tax him twenty-five cents for the collar button. He was able to return him for one borrowed, as he had got three of a similar kind for ten cents.

INCESSANT RAIN MARS LABOR DAY

Big Parade in Edmonton is Abandoned and Sports are Postponed for Two Weeks

The incessant downpour of rain yesterday effectively ended the Labor Day celebration here as planned. The union men of the city had planned a parade for the morning, to be followed by the afternoon by an extensive program of athletic sports and horse races at the Exhibition grounds.

The inclemency of the weather prevented the holding of either the parade or the sports. When the promoters of the celebration saw the utter hopelessness of holding the events planned a delegation interviewed Mayor Lee, who promised the union men that he would promise a half-holiday on a day to be decided upon by the committee of management of the Labor Union within the next two weeks when the sports will be held.

In many other western centers rain yesterday spoiled the celebrations.

Winnipeg, Sept. 5.—Drenching rain all day effectively doomed all Labor day sports, various by occasional clouds. It will be measured by inches the twenty-four hours and it looks like continuing all night. Reports from Manitoba and many other western points indicate a general heavy rainfall today and harvesting operations will be severely checked. Local forecasters claim it is the heaviest continuous fall for several years.

JILTED BY FIANCEE HE ATTEMPTS SUICIDE

Ed. Emond, Stone Cutter, Laid out the Point of Death at General Hospital Suffering from Effects of Poison Was to Have Been Married, but died Disgracefully.

With his throat in a frightfully ruptured condition, a young man, 28 years of age named E. Emond, a stonecutter employed at the Hotel Le Marchand, was laid out at the point of death at the General Hospital.

Emond was discovered yesterday afternoon about half-past four o'clock in his shack at 1313 Thirtieth street in an unconscious condition. He was seen to be lying on the floor, through the window by some companions who came round to his place of abode to call upon him.

The visitors became alarmed and summoned Dr. Duncan Smith, who was found on his way to the hospital. It was found that the unfortunate man was suffering from poisoning as the result of taking permanganate of potash crystals, some of which were found in a bottle near by. He was hurried to the General Hospital where everything possible was done to alleviate his suffering. Last night he was resting fairly easily and it is thought he may recover, though there is expressed that complications may set in.

No explanation has yet been given of the poisoning as Emond has been using permanganate of potash for some time. It was found, however, that he was to have been married yesterday but the young lady in the hospital had died of the same condition and it is thought that he may have been to end his life as a result of his disappointment.
